

STEVEN LECHTNER

EDUCATION

Bachelor of Science (B.S.) - Computer Science, May 2024
University of Michigan, Ann Arbor
GPA: 3.7/4.0

PROFESSIONAL SUMMARY

Adept in C++, Python, and Unity, I spearhead innovative projects at BAGTech Solutions LLC and have delivered a groundbreaking AR application for national security at the University of Michigan. Collaborative and proficient, I enhance visualization software and data-driven systems.

EXPERIENCE

BAGTech Solutions LLC | Sterling, Virginia, USA

Software Engineer | March 2026 - June 2026

Junior Software Engineer | March 2025 - March 2026

- Developing and integrating software supporting situational awareness tools for tactical defense operations.
- Engineering cross-platform solutions for AR, embedded, and mobile environments using several languages and engines with diverse operating systems and hardware platforms.
- Updating and maintaining codebases for scalability, performance, and reliability.
- Independently identify and define technical tasks, designing end-to-end solutions, and seamlessly unite with cross-functional teams to live environments.

University of Michigan | Ann Arbor, Michigan, USA

May 2023 - September 2024

MTV Undergrad Summers Fellow

- Created and deployed HoloLens 2 visualization tools given radiation input data from a provided Handheld Dual-Particle Imager (H2DPI) using a pipelined imaging algorithm. Real world adaptations include national security and locating radiation sources.
- Visualized a heatmap on colliding objects through the HoloLens 2's spatial awareness system by transforming the direction of a present radiation source.
- Identified the results of a 3D imaging algorithm derived from collected radiation data, utilizing voxelization to generate visual detections over 100% of the desired area.
- Coordinated with a cross-disciplinary team of 10+ researchers and faculty, to achieve user-friendly visualization efforts requiring 0 prior nuclear engineering knowledge.

January 2023 - May 2023

Video Game Development

- Implemented a novel 2D puzzle co-op video game with 4 other developers.
- Designed and developed 21 levels, menu and input configurations, and gameplay polish.
- Established a remastered version of the 1st dungeon in The Legend of Zelda providing 100% authentic enemy actions and level design features.

West Bloomfield, Michigan, USA

January 2016 - December 2019

Classroom Teacher's Assistant

Parry Sound, Ontario, Canada

June 2019 - August 2019

Counselor

Ann Arbor, Michigan 48103

(734) 478-1358
stvnlech@umich.edu

SKILLS

- C++
- Python
- Unity/C#
- Android Studio
- HTML/CSS
- Java
- Visual Studio
- TCP
- Git
- GStreamer

COURSEWORK

- EECS 494: Computer Game Design and Development
- EECS 485: Web Systems
- EECS 281: Data Structures and Algorithms
